BUY
At the Fag-End of Weak Business Cycle -Maintain BUY

During Q4FY19, MSIL sales grew by 1.4% YoY to Rs214.6bn (below our estimates Rs235 bn). Its EBITDA margins declined by 370bps to 10.5% (below our estimates of 12.5%). PAT declined by 4.6% YoY to Rs 17.9bn (below our estimates of Rs19.5bn). To factor in present business outlook we reduce our volume and PAT estimates by 0.6%/0.7% and 13.6%/8.3% for FY20E and FY21E respectively. We retain our BUY rating on the stock with a revised price target of Rs 7977 (PER of 25x FY21E) as we remain positive on the MSIL's growth prospects given the low 4W penetration in India and MSIL's competitive advantages like strong brand and distribution network.

Q4FY19 Result Review: During Q4FY19, MSIL's net sales grew by 1.4% YoY to Rs214.6bn (Our Estimates Rs235bn) driven by 0.7% volume decline (4.58lacs) and 2.1% increase in average realizations (Rs4.6lacs per unit). Its EBITDA margins declined by 370bps to 10.5% (below our estimates of 12.5%). PAT of the company declined by 4.6% YoY to Rs 17.9bn (below our estimates of Rs19.5bn). Higher other income (up 45.8% YoY) and lower tax rate supported the overall earnings of the Company.

Volume growth during FY19 supported by Rural Market and UV segment: During FY19, MSIL reported volume growth of 4.7% vs. Domestic PV industry growth of 2.7%. The Company sold 18,62,450 vehicles in FY19 compared to 17,79,574 in FY18. This growth was primarily supported by utility segment and rural markets which grew by 10%+ in H2FY19. Going forward Management expects volume growth to remain tepid during Q1FY20 while Chairman of the Company has guided 4%-8% volume growth during FY20. This is based on its strong product portfolio and likely uptake in the economic growth beginning from Q2FY20 in the country.

EBITDA Margin contracted by 370bps: The Company reported EBITDA margins of 10.5%, 370bps decline YoY. This decline is attributed to higher commodity prices, adverse foreign exchange movement and higher sales promotion expense. On the back of recent price hike and lowering discounts, Management anticipates gross and EBITDA margin recovery during FY20. We understand, despite scale benefits and richer product mix, overall margin recovery will take at least 2-3 quarters as volume growth remains soft.

Maruti Suzuki

Growth Outlook: As per the management 4W demand in India continues to remain soft. Growth in urban areas has been negative while rural demand has grown 10%+ YoY. For MSIL, rural segment contributes ~40% of total volumes. We believe, for MSIL, double digit volume growth is likely to be challenging for the next 2-3 quarters on account of subdued consumer sentiments and slow economic growth in the country. However growth is likely to rebound post Q1FY20 as uncertainties related to Monsoon and General Election is likely to be over. We expect MSIL to report 6%/9% volume growth during FY20E/21E.

Earning Revision: For MSIL, we reduce our volume, sales and PAT estimates by 0.6%/0.7%, 2.7%/2.8% and 13.7%/8.3% for FY20E and FY21E respectively. We expect MSIL to report 7.5% volume CAGR, 10.4% sales CAGR and 13.3% PAT CAGR over FY19-21E. The Company is expected to report EPS of Rs261 and Rs319 in FY20E and FY21E respectively.

Valuations and recommendations: While near term growth outlook for MSIL remains challenging, we remain positive on the MSIL's medium term growth prospects given the low 4W penetration in India and MSIL's competitive advantages like strong brand and distribution network. With 2500+ distribution centers and seven blockbuster models (Dzire, Swift, Alto, Baleno, Ertiga, WagonR and Vitara Brezza) MSIL currently dominates the Indian car market. We do not see any major threat to its product portfolio and its product pricing. MSIL is expected to possess ~Rs476bn cash on its balance sheet by FY21E. At CMP of Rs 6905, MSIL stock is quoting at PE of 21.6x FY21 earnings. We reiterate our BUY rating on the stock with a revised price target of Rs 7977 (PER of 25x FY21E).
